环保物料		物料明细表 Material list			
序号 NO.	部件 PARTS	线材、端子、(部件) 胶壳 Cable, Terminal (Part) Housing			数量 Quantity
①	胶壳	P2510-04	XFCN 兴飞		1PCS
②	端子	T2510PS-2	XFCN 兴飞		4PCS
③	线材	UL2468 24AWG	蓝白排线 4P		1PCS

技术要求:

- 1.1. 端子铆接牢固，无松动，脱落现象；
- 1.2. 线材印字清晰，无破损划伤；
2. 外观要求按品质管理部检验标准执行
3. 包装要求按包装作业指引或者客户制定包装要求

Technical drawing of a cable assembly. The drawing includes three views: a perspective view of the connector, a top view of the connector, and a side view of the cable assembly. The connector is a 4-pin D-sub connector. The cable assembly consists of a 4-pin connector, a 4-pin terminal block, and a cable with four conductors. The cable length is specified as 150 ± 5 . The conductors are labeled 1, 2, 3, and 4. The conductors are twisted and shielded. The shield is labeled "蓝" (blue). The conductors are twisted and shielded. The shield is labeled "蓝" (blue). The conductors are twisted and shielded. The shield is labeled "蓝" (blue). The conductors are twisted and shielded. The shield is labeled "蓝" (blue). The conductors are twisted and shielded. The shield is labeled "蓝" (blue). The conductors are twisted and shielded. The shield is labeled "蓝" (blue). The conductors are twisted and shielded. The shield is labeled "蓝" (blue). The conductors are twisted and shielded. The shield is labeled "蓝" (blue). The conductors are twisted and shielded. The shield is labeled "蓝" (blue). The conductors are twisted and shielded. The shield is labeled "蓝" (blue). The conductors are twisted and shielded. The shield is labeled "蓝" (blue). The conductors are twisted and shielded. The shield is labeled "蓝" (blue). The conductors are twisted and shielded. The shield is labeled "蓝" (blue). The conductors are twisted and shielded. The shield is labeled "蓝" (blue). The conductors are twisted and shielded. The shield is labeled "蓝" (blue). The conductors are twisted and shielded. The shield is labeled "蓝" (blue). The conductors are twisted and shielded. The shield is labeled "蓝" (blue). The conductors are twisted and shielded. The shield is labeled "蓝" (blue). The conductors are twisted and shielded. The shield is labeled "蓝" (blue). The conductors are twisted and shielded. The shield is labeled "蓝" (blue). The conductors are twisted and shielded. The shield is labeled "蓝" (blue). The conductors are twisted and shielded. The shield is labeled "蓝" (blue). The conductors are twisted and shielded. The shield is labeled "蓝" (blue). The conductors are twisted and shielded. The shield is labeled "蓝" (blue). The conductors are twisted and shielded. The shield is labeled "蓝" (blue). The conductors are twisted and shielded. The shield is labeled "蓝" (blue). The conductors are twisted and shielded. The shield is labeled "蓝" (blue). The conductors are twisted and shielded. The shield is labeled "蓝" (blue). The conductors are twisted and shielded. The shield is labeled "蓝" (blue). The conductors are twisted and shielded. The shield is labeled "蓝" (blue). The conductors are twisted and shielded. The shield is labeled "蓝" (blue). The conductors are twisted and shielded. The shield is labeled "蓝" (blue). The conductors are twisted and shielded. The shield is labeled "蓝" (blue). The conductors are twisted and shielded. The shield is labeled "蓝" (blue). The conductors are twisted and shielded. The shield is labeled "蓝" (blue). The conductors are twisted and shielded. The shield is labeled "蓝" (blue). The conductors are twisted and shielded. The shield is labeled "蓝" (blue).
